

# How Much Product Do I Need

1. Figure the length of the area to cover.
2. Figure the width of the area to cover.
3. Multiply length by width to calculate square footage.
4. Locate the square footage in the first column of the chart below.
5. Locate the depth in inches required for your project across the top row of the chart. (We recommend 2-4 inches for mulching; 12 inches for certified playground mulch)
6. The corresponding number represents a close approximation of the number of cubic yards required.

## DEPTH IN INCHES

	2"	3"	4"	6"	8"	12"
50	0.25	0.50	0.50	1.00	1.00	2.00
100	0.50	1.00	1.00	2.00	2.50	4.00
150	1.00	1.50	2.00	3.00	4.00	6.00
200	1.00	2.00	2.50	3.50	5.00	7.50
250	1.50	2.50	3.00	4.50	6.00	9.00
300	2.00	3.00	3.50	5.50	7.50	11.00
350	2.00	3.50	4.50	6.50	9.00	13.00
400	2.50	4.00	5.00	7.50	10.00	15.00
450	3.00	4.50	5.50	8.50	11.00	17.00
500	3.00	4.50	6.00	9.00	12.00	18.50
550	3.50	5.00	7.00	10.00	13.50	20.00
600	3.50	5.50	7.50	11.00	15.00	22.00
650	4.00	6.00	8.00	12.00	16.00	24.00
700	4.00	6.50	8.50	13.00	17.00	26.00
750	4.50	7.00	9.50	14.00	18.50	28.00
800	5.00	7.50	10.00	15.00	20.00	30.00
850	5.00	8.00	10.50	15.50	21.00	31.00
900	5.50	8.50	11.00	17.00	22.00	33.00
950	6.00	9.00	12.00	17.50	23.00	35.00
1000	6.00	9.00	12.00	18.50	25.00	37.00

Example: Area of 50 sq ft at 2 in depth = .25 cu yd
